

TabPOS Dock & Charge™

Tablet Solutions

TabletPOS, mPOS, assisted sales and self-service in one single solution

The patented Dock & Charge is a combined tablet enclosure and stand that maximizes the use of your tablet. For mobility, bring that personal shopper service or sales transaction to the customer anywhere instore, or at the table. Take advantage of the Dock & Charge secure docking and charging capabilities to bring self-service standalone applications to life.

Compatibility

Dock & Charge enclosure is compatible with tablets from Apple & Samsung and comes with its own range of mounts.

Features

- **Seamless docking of tablet:** The secure magnetic charging dock ensures fast and seamless keyless engagement in either portrait or landscape mode
- **Dock it your way:** Dock & Charge can be counter, wall or floor mounted
- **Configurable:** Dock & Charge supports the mounting of a payment terminal on the back on the enclosure and charging of the device via USB-C
- **Portability:** Dock & Charge is compatible with a set of accessories. Hand straps and shoulder straps ensure the ergonomically correct method of carrying, and ease of use in mobile applications

Benefits

- **Maximum utilization:** The simple docking of the tablet makes it easy to change from static to mobile applications
- **Useability:** Dock & Charge supports multiple applications and mounting locations
- **Create a Mobile POS, fixed POS or hybrid POS:** Add payment devices to suit your application
- **Ergonomics:** Operators are comfortable and safe using Dock & Charge. Accessories ensure minimal accidental drops & compliance with mobile best practice
