SpacePole DuraTilt®

Payment Solutions

Why mount a payment terminal?

Today's point of sale requires fast reliable transactions with a focus on frictionless payments. SpacePole payment mounting solutions enable your business to reflect these customer demands and keep relevant in an environment where staff and customer welfare is paramount.

About

A payment terminal that is mounted is far less likely to suffer from particle or liquid ingress with the transaction taking place in a more hygienic manner. A mounted terminal requires less physical interaction than one that is simply placed on the counter top. Mounting the terminal also reduces the chances of accidental drops and cable damage.

Applications

- Secure counter top payments
- Perfect for retail or hospitality environments or anywhere accepting payment transactions

Benefits

- Unique ergonomic design

- Tried and tested solution

- Fully compatible with MultiGrip™ and MultiClip™

- Internal cable management and cable protection

Technical specifications

SpacePole DuraTilt is cost-effective for payment terminal upgrades. Unlike other offerings, when you change your payment terminal, it is a case of just swapping the existing MultiGrip plate to one compatible with your new terminal. The rest of the solution remains the same. It is as simple as that.

DuraTilt comes with a 5-year manufacturer's warranty and with more than 1.2 million installations worldwide in the last 7 years, it is easy to see why DuraTilt is seen as the world's leading payment mount.
